Once you publish this, I'm going to make it required reading for my clients! You have hit the nail on the HR head! I've defended companies and management for the last 14 years in primarily discrimination, harassment, and wrongful termination litigation. I wholeheartedly proclaim: This book is right on. You are pushing the pendulum back to a realistic and healthy point. Thank you not just for my clients that I defend in these cases, but the office that I manage.
